

CLASS ASSIGNMENT #1

- This assignment is part of the “In/Out of Class Projects” requirement.
- It is worth 20 points.
- It is due **Jan 23 (Thursday)**.
- **Late papers will not be accepted.**

Assignment Instructions

- Go to the following website: National Crime Victimization Survey <http://bjs.gov>
 - Go to the *Data Analysis Tools* tab at the top of the page
 - Click on *View Dynamic Tools*
 - Click on Victimization Analysis Tool
 - Go to *Custom Tables* link
 - Begin customizing your tables according to the instructions provided below.
-
- You will construct a total of 3 tables of your own making. However; the tables must adhere to the following terms:
 - Table 1- This table should chart a trend (more than 5 years) for any type of victimization (personal or property)
 - Table 2- This table should identify a specific victimization type and 1 of the variables from the drop down list. You can pick as many or as few years as you like.
 - Table 3-This table should identify a specific victimization type and 2 variables from the drop down list. Pick just 1 year to analyze.
 - Print out the 3 tables.
 - Below each table; clearly handwrite one statement that describes a major (outstanding) finding presented in the table. Be specific and thorough. Basically; you are reporting on what the table (the numbers) says. If you need an example of how to write this; you can look in the textbook or peruse this website for existing tables and the interpretations will be provided.
